About Me

After a year abroad studying business and 2 years of consulting at IBM La Gaude for SII and Alten, I wanted to start a company of my own and created Playadz along with 3 co founders in 2007.
Initially meant to provide a geolocalized coupon based service for every customer on earth at a time when the iPhone did not exist yet, we raised 400k€ at the end of 2008.
We realized a fully functionnal end to end solution but did not manage to sell it to enough shops. Thus we decided to sell the technology we developed to malls and ended up being a privileged partner for web agencies for developping mobile apps.
Innovation and passion have been the master words during this 7 years and we finally sold the company to Ausy in order to become their mobility excellence pole.
One year after that, a new opportunity arised after a meeting with the CEO of iwecloud and I decided to take the chance of the new challenge

My pros:
- Real experience in team leading
- Innovation enthusiast
- Passionate Tech watcher
- We/mobile architecture/dev
- Framework development
- PHP Symfony 2 dev
- AngularJS and NodeJs
- Agile: Kanban and Scrum
- Know what it is to be a CEO :-)
- Risk/People/Company Mgmt
- Decision maker/solution finder
- happy guy !
- and more

Martin Ratinaud
Full Stack tech lead - NodeJS/AngularJS - PHP/Symfony2
